PATIENT INFORMATION
ORKAMBI (or-KAM-bee)
lumacaftor and ivacaftor) tablets for oral use
(lumacaftor and ivacaftor) oral granules

What is ORKAMBI?

• ORKAMBI is a prescription medicine used for the treatment of cystic fibrosis (CF) in people aged 1 year and older who have two copies of the F508del mutation (F508del/F508del) in their CFTR gene.
• ORKAMBI should not be used in people other than those who have two copies of the F508del mutation in their CFTR gene.

It is not known if ORKAMBI is safe and effective in children under 1 year of age.

Before taking ORKAMBI, tell your doctor about all of your medical conditions, including if you:

• have or have had liver problems.
• are allergic to ORKAMBI or any ingredients in ORKAMBI. See the end of this patient information leaflet for a complete list of ingredients in ORKAMBI.
• have kidney problems.
• have lung problems.
• have had an organ transplant.
• are using birth control (hormonal contraceptives, including oral, injectable, transdermal, or implantable forms). Hormonal contraceptives should not be used as a method of birth control when taking ORKAMBI. Talk to your doctor about the best birth control method you should use while taking ORKAMBI.
• are pregnant or plan to become pregnant. It is not known if ORKAMBI will harm your unborn baby. You and your doctor should decide if you will take ORKAMBI while you are pregnant.
• are breastfeeding or planning to breastfeed. It is not known if ORKAMBI passes into your breast milk. You and your doctor should decide if you will take ORKAMBI while you are breastfeeding.

Tell your doctor about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

ORKAMBI may affect the way other medicines work, and other medicines may affect how ORKAMBI works. The dose of ORKAMBI may need to be adjusted when taken with certain medicines. Ask your doctor or pharmacist for a list of these medicines if you are not sure.

Especially tell your doctor if you take:

• antibiotics: rifampin (RIFAMATE®, RIFATER®) or rifabutin (MYCOBUTIN®).
• seizure medicines: phenobarbital, carbamazepine (TEGRETOL®, CARBATROL®, EQUETRO®), or phenytoin (DILANTIN®, PHENYTEK®).
• sedatives and anti-anxiety medicines: triazolam (HALCION®) or midazolam (DORMICUM®, HYPNOVEL®, and VERSED®).
• immunosuppressant medicines: cyclosporine, everolimus (ZORTRESS®), sirolimus (RAPAMUNE®), or tacrolimus (ASTAGRAF XL®, ENVARSUS® XR, PROGRAF®, and PROTOPIC®).
• St. John’s wort (Hypericum perforatum).
• antifungal medicines including ketoconazole, itraconazole (such as SPORANOX®), posaconazole (such as NOXAFIL®), or voriconazole (such as VFEND®).
• antibiotics including telithromycin, clarithromycin (such as BIAXIN®), or erythromycin (such as ERY-TAB®).

Know the medicines you take. Keep a list of them to show your doctor and pharmacist when you get a new medicine.

How should I take ORKAMBI?

• Take ORKAMBI exactly as your doctor tells you to take it.
• Always take ORKAMBI tablets or granules with foods that contain fat. Examples of fat-containing foods include eggs, avocados, nuts, butter, peanut butter, cheese pizza, breast milk, infant formula, whole-milk dairy products (such as whole milk, cheese, and yogurt).
• Take your doses of ORKAMBI 12 hours apart.
• ORKAMBI tablets (aged 6 years and older):
  o Each ORKAMBI box contains 4 weekly cartons.
  o Each carton contains 7 daily blister strips.
  o Each blister strip contains 4 tablets so you can take 2 tablets for the morning and 2 tablets for the evening.
  o You may cut along the dotted line to separate your morning dose from your evening dose.
To take your morning dose, unpeel the paper backing from a blister strip (do not push tablet through backing) to remove 2 ORKAMBI tablets and take them with fat-containing food.

12 hours after your previous dose, open another blister strip (do not push tablet through backing) to remove 2 ORKAMBI tablets and take them with fat-containing food.

**ORKAMBI oral granules (aged 1 to under 6 years old):**

- Hold the packet with the cut line on top.
- Shake the packet gently to settle the ORKAMBI granules.
- Tear or cut packet open along cut line.
- Carefully pour all of the ORKAMBI granules in the packet into one teaspoon (5 mL) of soft food or liquid in a small container (like an empty bowl).
- The food or liquid should be at or below room temperature. Examples of soft foods or liquids include puréed fruits or vegetables, flavored yogurt or pudding, applesauce, water, milk, breast milk, infant formula or juice. Mix the ORKAMBI granules with food or liquid.
- After mixing, give ORKAMBI within 1 hour. Make sure all medicine is taken.
- Give a child fat-containing food just before or just after the ORKAMBI granules dose (see examples above).

**If you miss a dose within 6 hours** of when you usually take it, take your dose with fat-containing food as soon as possible.

**If you miss a dose and it is more than 6 hours after the time you usually take it,** skip that dose only and take the next dose when you usually take it. Do not take 2 doses at the same time to make up for your missed dose.

Tell your doctor if you stop ORKAMBI for more than 1-week. Your doctor may need to change your dose of ORKAMBI or other medicines you take.

**What should I avoid while taking ORKAMBI?**

Do not eat or drink grapefruit products during your first week of treatment with ORKAMBI. Eating or drinking grapefruit products can increase the amount of ORKAMBI in your blood.

**What are the possible side effects of ORKAMBI?**

**ORKAMBI can cause serious side effects, including:**

- **Worsening of liver function** in people with severe liver disease. The worsening of liver function can be serious or cause death. Talk to your doctor if you have been told you have liver disease as your doctor may need to adjust the dose of ORKAMBI.

- **High liver enzymes in the blood**, which can be a sign of liver injury in people receiving ORKAMBI. Your doctor will do blood tests to check your liver:
  - before you start ORKAMBI
  - every 3 months during your first year of taking ORKAMBI
  - every year while you are taking ORKAMBI

Call your doctor right away if you have any of the following symptoms of liver problems:

- pain or discomfort in the upper right stomach (abdominal) area
- loss of appetite
- dark, amber-colored urine
- yellowing of your skin or the white part of your eyes
- nausea or vomiting
- confusion

- **Serious Allergic Reactions** can happen to people who are treated with ORKAMBI. Call your doctor or go to the emergency room right away if you have any symptoms of an allergic reaction. Symptoms of an allergic reaction may include:
  - rash or hives
  - tightness of the chest or throat or difficulty breathing
  - swelling of the face, lips, and/or tongue, difficulty swallowing
  - light-headedness or dizziness

- **Breathing problems** such as trouble breathing, shortness of breath or chest tightness in people when starting ORKAMBI, especially in people who have poor lung function. If you have poor lung function, your doctor may monitor you more closely when you start ORKAMBI. Call your doctor right away if you have trouble breathing, shortness of breath or chest tightness.

- **An increase in blood pressure** in some people receiving ORKAMBI. Your doctor should monitor your blood pressure during treatment with ORKAMBI. Call your doctor right away if you have an increase in blood pressure.
• Abnormality of the eye lens (cataract) in some children and adolescents receiving ORKAMBI. If you are a child or adolescent, your doctor should perform eye examinations before and during treatment with ORKAMBI to look for cataracts.

The most common side effects of ORKAMBI include:

• breathing problems such as shortness of breath and chest tightness
• nausea
• diarrhea
• fatigue
• increase in a certain blood enzyme called creatine phosphokinase
• rash
• gas
• common cold, including sore throat, stuffy or runny nose
• flu or flu-like symptoms
• irregular, missed, or abnormal periods (menstrual bleeding)
• increase in the amount of menstrual bleeding

Additional side effects in children
Side effects seen in children are similar to those seen in adults and adolescents. Additional common side effects seen in children include:

• cough with sputum
• stuffy nose
• headache
• stomach pain
• increase in sputum

Tell your doctor if you have any side effect that bothers you or that does not go away.

These are not all the possible side effects of ORKAMBI. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

How should I store ORKAMBI?
• Store ORKAMBI at room temperature between 68°F to 77°F (20°C to 25°C).

Keep ORKAMBI and all medicines out of the reach of children.

General information about the safe and effective use of ORKAMBI.
Medicines are sometimes prescribed for purposes other than those listed in a Patient Information leaflet. Do not use ORKAMBI for a condition for which it was not prescribed. Do not give ORKAMBI to other people, even if they have the same symptoms you have. It may harm them.

You can ask your pharmacist or doctor for information about ORKAMBI that is written for health professionals.

What are the ingredients in ORKAMBI?
ORKAMBI tablets:
Active ingredients: lumacaftor and ivacaftor
Inactive ingredients: cellulose, microcrystalline; croscarmellose sodium; hypromellose acetate succinate; magnesium stearate; povidone; and sodium lauryl sulfate.
The tablet film coat contains: carmine, FD&C Blue #1, FD&C Blue #2, polyethylene glycol, polyvinyl alcohol, talc, and titanium dioxide.
The printing ink contains: ammonium hydroxide, iron oxide black, propylene glycol, and shellac.

ORKAMBI oral granules
Active ingredients: lumacaftor and ivacaftor
Inactive ingredients: cellulose, microcrystalline; croscarmellose sodium; hypromellose acetate succinate; povidone; and sodium lauryl sulfate.
